I. Business Case

This project aims to develop a comprehensive physical to digital library conversion system to address the inefficiencies in managing physical records within libraries. The system will provide a user-friendly interface for both library customers and administrators/librarians, assisting in the transition from traditional, paper-based record keeping, to a more streamlined and accessible digital format.

XYZ is a public library that has been serving the community since 2023. The library's main activities and services include book lending from an extensive collection of books, digital resources catering to its tech savvy patrons, community engagement through children's programs, book clubs, reading workshops and community spaces that provide educational support. Revenues primarily come from sources of funding, membership fees, and grants. Despite its rich collection of physical resources, the library currently faces challenges in terms of organizing and accessing information efficiently.

II. Scope of Work

Project Objective

The primary objective of the Library Digitization Project is to create a comprehensive physical to digital library conversion system that streamlines record keeping processes, enhances accessibility for library patrons, and provides efficient management tools for library administrators. The system aims to transition the library from manual paper based record keeping to a digital platform, improving overall efficiency. This project is to be completed by December 15, 2023 and not to exceed the cost of \$20,000.

System Requirements

The Library Digitization Project will require:

- Database and Tables
- Login/Logout Functionality
- User Interface for **Library Customers** that will allow them to:
 - View collection of books
 - View if a book is currently available or checked out
 - View what books they currently have checked out
 - Check out a book
- User Interface for **Librarian Administrators** that will allow them to:
 - add/delete users
 - add/edit/delete a book
 - Edit “checked out” status of a book
 - View a list of what books are currently checked out

Technical Requirements

Requirements to develop the system using PHP, HTML, CSS, JavaScript and MySQL include:

- Computers
- Internet access
- Server access with necessary hard drive space
- Software to include:
 - Visual Studio
 - cPanel
 - MySQL
 - phpMyAdmin
 - FileZilla
 - Google Docs
 - Microsoft Excel
 - Microsoft Teams

- Microsoft Project

System Testing

- Conduct thorough testing at various stages, including unit testing, integration testing, and user acceptance testing.
- Address any identified issues promptly to ensure the system meets performance and functionality requirements

Limits and Exclusions

- The project scope excludes the physical relocation or disposal of existing library materials.
- The system does not cover external integrations with third party library management systems.

Assumptions and Constraints

- It is assumed that library staff will receive adequate training to use the new digitalisation system effectively.
- The project is constrained by the available budget and resources allocated for development and implementation.
- Necessary technology will be accessible and in working order throughout the project (Server, Internet, company website).

Project Management-Related Deliverables

- Business Case and Scope Statement.
- Develop a detailed Work Breakdown Structure (WBS) outlining project tasks and subtasks.
- Create a Gantt Chart, PDM Diagram, and milestones to track project progress.
- Compile a WBS Dictionary to provide detailed descriptions of each task.
- Address financial aspects, including budget allocation and resource planning.
- Identify and manage potential risks associated with the project.

Product-Related Deliverables

- Develop a system prototype for testing and feedback.
 - Database and Tables
 - Login/Logout Functionality
 - User Interface for Library Customers
 - User Interface for Library Administrators
- Create comprehensive system documentation for both end users and technical staff.
 - Users: Brief documentation of instructions and everything possible users of the system would need to know.

- Technical: Basic maintenance guidelines including a list of technical requirements for the system (code), description of table relationships(ERD & table schemas), and website structure map.

III. Work Breakdown Structure (WBS)

Outline number	Name	Assigned to:	Duration	Risk	Start	Finish	Effort
1	Initiating	Everyone	7.5 days	Low	8/23/202	9/1/202	72 hours
1.1	Develop Project Charter	Everyone	3.5 days	Low	8/23/202	8/28/202	32 hours
1.1.1	Identify Goals and Objectives	Everyone	1 day	Low	8/23/202	8/23/202	8 hours
1.1.2	Develop Strategies and Plans	Everyone	1 day	Low	8/24/202	8/24/202	8 hours
1.1.3	Research Previous Experience	Everyone	1 day	Low	8/25/202	8/25/202	8 hours
1.1.4	Develop Project Charter	Everyone	0.5 days	Low	8/28/202	8/28/202	8 hours
1.2	Develop Preliminary Project Scope Statement	Everyone	4 days	Low	8/28/202	9/1/202	40 hours
1.2.1	Conduct Planning Workshop	Everyone	1 day	Low	8/28/202	8/29/202	8 hours
1.2.2	Document Project Costs and Benefits	Michael Binelli	0.5 days	Medium	8/29/202	8/29/202	8 hours
1.2.3	Develop High Level Work Breakdown Structure	Michael Binelli	1 day	Low	8/30/202	8/30/202	8 hours
1.2.4	Conduct Peer Review	Everyone	1 day	Low	8/31/202	8/31/202	8 hours
1.2.5	Prepare Preliminary Project Scope Statement	Michael Binelli	0.5 days	Low	9/1/2023	9/1/2023	8 hours
2	Planning	Everyone	27 days	Low	9/1/2023	10/10/2023	248 hours

						9/7/202	
2.1	Set Up Project Environment	Everyone	4 days	Low	9/1/2023	3	32 hours
2.1.1	Prepare Facilities	Everyone	1 day	Medium	9/1/2023	9/4/2023	8 hours
2.1.2	Set Up Project Standards and Procedures	Everyone	1 day	Low	9/4/2023	9/5/2023	8 hours
2.1.3	Set Up Project Management Tools	Everyone	1 day	Low	9/5/2023	9/6/2023	8 hours
2.1.4	Set Up Project Book	Everyone	1 day	Low	9/6/2023	9/7/2023	8 hours
2.2	Define Scope	Michael Binelli	4 days	Low	9/7/2023	23	32 hours
2.2.1	Document Scope Management Plan	Michael Binelli	1 day	Low	9/7/2023	9/8/2023	8 hours
2.2.2	Specify Deliverables and Acceptance Criteria	Michael Binelli	1 day	Low	9/8/2023	3	8 hours
2.2.3	Define Scope	Michael Binelli	1 day	Low	9/11/202	9/12/202	
2.2.4	Document Assumptions	Michael Binelli	1 day	Low	3	3	8 hours
2.3	Develop Project Schedule		5 days	Low	9/13/202	9/20/20	40 hours
2.3.1	Build Work Breakdown Structure	Michael Binelli	1 day	Low	9/13/202	9/14/202	
2.3.2	Develop Resource Plans	Michael Binelli	1 day	Low	3	3	8 hours
2.3.3	Prepare Project Estimates	Michael Binelli	1 day	Low	9/15/202	9/18/202	
2.3.4	Define Dependencies and Develop Project Schedule	Everyone	1 day	Low	3	3	8 hours
2.3.5	Document Assumptions	Michael Binelli	1 day	Low	9/19/202	9/20/202	
2.4	Develop Risk Plans	Michael Binelli	3 days	Low	9/20/202	9/25/20	32 hours
2.4.1	Document Risk Management Plan	Michael Binelli	0.5 days	Low	9/20/202	9/20/202	8 hours

2.4.2	Identify Risks	Michael Binelli	1 day	Medium	9/21/202	9/21/202	
2.4.3	Analyze Risks	Everyone	1 day	Low	9/22/202	9/22/202	
2.4.4	Document Risk Management Plans	Michael Binelli	0.5 days	Low	9/25/202	9/25/202	
2.5	Plan for Quality	Everyone	0.5 days	Low	9/25/202	9/25/2023	8 hours
2.5.1	Document Quality Management Plan	Michael Binelli	0.5 days	Low	9/25/202	9/25/202	
2.6	Organize Project Resources	Michael Binelli	2 days	Low	9/26/202	9/27/2023	16 hours
2.6.1	Develop Organization Structure	Michael Binelli	1 day	Low	9/26/202	9/26/202	
2.6.2	Develop Staffing Plan	Michael Binelli	1 day	Medium	9/27/202	9/27/202	
2.7	Develop Procurement Plans	Everyone	4.5 days	Low	9/28/202	10/4/2023	40 hours
2.7.1	Determine Procurement Requirements	Everyone	1 day	Low	9/28/202	9/28/202	
2.7.2	Define Subcontractor Scope	Damyan Michel	1 day	Low	9/29/202	9/29/202	
2.7.3	Identify Potential Subcontractors	Everyone	1 day	Medium	10/2/202	10/2/202	
2.7.4	Identify Subcontract Type	Damyan Michel	1 day	Medium	10/3/202	10/3/202	
2.7.5	Document Subcontractor Management Plan	Michael Binelli	0.5 days	Low	10/4/202	10/4/202	
2.8	Develop Financial Plan	Michael Binelli	2 days	Medium	10/4/202	10/6/2023	16 hours
2.8.1	Prepare Financial Plan	Michael Binelli	1 day	Medium	10/4/202	10/5/202	
2.8.2	Document Assumptions	Michael Binelli	1 day	Low	10/5/202	10/6/202	
							8 hours

2.9	Develop Project Support Plans	Everyone	1.5 days	Medium	10/6/202	10/9/2023	24 hours
2.9.1	Document Communications Management Plan	Everyone	0.5 days	Low	10/6/202	10/6/2023	
2.9.2	Document Configuration Management Plan	Seth Kaderabek	0.5 days	Medium	10/9/202	10/9/2023	8 hours
2.9.3	Document Data Management Plan	Damyan Michel	0.5 days	Medium	10/9/202	10/9/2023	8 hours
2.1	Develop Project Management Plan	Michael Binelli	0.5 days	Low	10/10/202	10/10/2023	8 hours
2.10.1	Document Project Management Plan	Michael Binelli	0.5 days	Low	10/10/202	10/10/2023	8 hours
3	Executing	Everyone	18 days	Medium	10/10/202	11/3/2023	144 hours
3.1	Acquire Project Team	Everyone	3 days	Low	10/10/202	10/13/2023	24 hours
3.1.1	Obtain Resources	Everyone	1 day	Low	10/10/202	10/11/2023	8 hours
3.1.2	Conduct Team Orientation	Everyone	1 day	Low	10/11/202	10/12/2023	8 hours
3.1.3	Assign Responsibilities	Michael Binelli	1 day	Low	10/12/202	10/13/2023	8 hours
3.2	Direct and Manage Project Execution	Everyone	5 days	High	10/13/202	10/20/2023	40 hours
3.2.1	Manage Data Items	Damyan Michel	1 day	High	10/13/202	10/16/2023	8 hours
3.2.2	Manage Configuration Items	Seth Kaderabek	1 day	High	10/16/202	10/17/2023	8 hours
3.2.3	Manage Process Data	Seth Kaderabek	1 day	High	10/17/202	10/18/2023	8 hours
3.2.4	Provide General Office Support	Everyone	1 day	Low	10/18/202	10/19/2023	8 hours

3.2.5	Administer Project Security Processes	Michael Binelli	1 day	High	10/19/20 23	10/20/20 23	8 hours
3.3	Manage Team Performance	Everyone	2 days	Low	10/20/20 23	10/24/20 023	16 hours
3.3.1	Provide Team Training	Everyone	1 day	Low	10/20/20 23	10/23/20 23	8 hours
3.3.2	Recognize Success	Everyone	1 day	Low	10/23/20 23	10/24/20 23	8 hours
3.4	Assure Quality	Everyone	4 days	Low	10/24/20 23	10/30/20 023	32 hours
3.4.1	Participate in Walk-throughs and Reviews	Everyone	1 day	Low	10/24/20 23	10/25/20 23	8 hours
3.4.2	Conduct Inspections and Audits	Everyone	1 day	Medium	10/25/20 23	10/26/20 23	8 hours
3.4.3	Conduct Project Reviews	Everyone	1 day	Low	10/26/20 23	10/27/20 23	8 hours
3.4.4	Facilitate Continuous Improvement	Everyone	1 day	Low	10/27/20 23	10/30/20 23	8 hours
3.5	Manage Project Communication	Everyone	1 day	Low	10/30/20 23	10/31/20 023	8 hours
3.5.1	Review Progress	Michael Binelli	1 day	Low	10/30/20 23	10/31/20 23	8 hours
3.6	Contracting with Subcontractors	Everyone	3 days	Medium	10/31/20 23	11/3/20 23	24 hours
3.6.1	Issue Requisition Documents	Seth Kaderabek	1 day	Medium	10/31/20 23	11/1/202 3	8 hours
3.6.2	Evaluate Responses	Damyan Michel	1 day	Low	11/1/202 3	11/2/202 3	8 hours
3.6.3	Negotiate Subcontractor Contract	Michael Binelli	1 day	Low	11/2/202 3	11/3/202 3	8 hours
4	Monitoring and Controlling	Everyone	25.5 days	Low	11/3/202 3	12/8/20 23	216 hours
4.1	Monitor and Control Project Work	Everyone	3 days	Low	11/3/202 3	11/8/20 23	24 hours

4.1.1	Authorize Work	Everyone	1 day	Low	11/3/202 3	11/6/202 3	8 hours
4.1.2	Manage Action Items	Everyone	1 day	Low	11/6/202 3	11/7/202 3	8 hours
4.1.3	Manage Project Records	Michael Binelli	1 day	Medium	11/7/202 3	11/8/202 3	8 hours
4.2	Integrated Change Control	Everyone	4 days	Low	11/8/202 3	11/14/2023	32 hours
4.2.1	Manage Scope	Michael Binelli	1 day	Low	11/8/202 3	11/9/202 3	8 hours

4.6	Perform Quality Control	Everyone	3 days	Low	11/23/20 23	11/27/20 023	24 hours
4.6.1	Control Quality	Damyan Michel	1 day	Medium	11/23/20 23	11/23/20 23	8 hours
4.6.2	Participate in Testing	Everyone	1 day	Low	11/24/20 23	11/24/20 23	8 hours
4.6.3	Measure Quality Levels	Damyan Michel	1 day	Low	11/27/20 23	11/27/20 23	8 hours
4.7	Manage Project Team	Everyone	4 days	Low	11/28/20 23	12/1/20 23	32 hours
4.7.1	Manage Communications	Everyone	1 day	Low	11/28/20 23	11/28/20 23	8 hours
4.7.2	Meet With Team	Everyone	1 day	Low	11/29/20 23	11/29/20 23	8 hours
4.7.3	Monitor Team Morale	Everyone	1 day	Low	11/30/20 23	11/30/20 23	8 hours
4.7.4	Conduct Team Performance Reviews	Everyone	1 day	Low	12/1/202 3	12/1/202 3	8 hours
4.8	Produce Performance Reports	Everyone	1 day	Low	12/4/202 3	12/4/20 23	16 hours
4.8.1	Report Weekly Status	Everyone	0.5 days	Low	12/4/202 3	12/4/202 3	8 hours
4.8.2	Report Monthly Status	Everyone	0.5 days	Low	12/4/202 3	12/4/202 3	8 hours
4.9	Manage Stakeholders	Michael Binelli	2 days	Low	12/5/202 3	12/6/20 23	16 hours
4.9.1	Monitor Satisfaction	Michael Binelli	1 day	Low	12/5/202 3	12/5/202 3	8 hours
4.9.2	Resolve Issues	Michael Binelli	1 day	Medium	12/6/202 3	12/6/202 3	8 hours
4.1	Risk Monitoring and Control	Michael Binelli	1 day	Low	12/7/202 3	12/7/20 23	8 hours

4.10.1	Manage Risks	Michael Binelli	1 day	Low	12/7/2023	12/7/2023	8 hours
4.11	Contract Administration	Everyone	1 day	Low	12/8/2023	12/8/2023	8 hours
4.11.1	Manage Subcontractor Contract	Everyone	1 day	Low	12/8/2023	12/8/2023	8 hours
5	Closing	Everyone	6 days	Low	12/11/2023	12/18/2023	48 hours
5.1	Close Project	Everyone	5 days	Low	12/11/2023	12/15/2023	40 hours
5.1.1	Assess Satisfaction	Everyone	1 day	Low	12/11/2023	12/11/2023	8 hours
5.1.2	Summarize Project Results and Lessons Learned	Everyone	1 day	Low	12/12/2023	12/12/2023	8 hours
5.1.3	Review and Recognize Team Performance	Everyone	1 day	Low	12/13/2023	12/13/2023	8 hours
5.1.4	Close Out the Project Records	Everyone	1 day	Low	12/14/2023	12/14/2023	8 hours
5.1.5	Review and Reconcile Financial Performance	Everyone	1 day	Low	12/15/2023	12/15/2023	8 hours
5.2	Contract Closure	Everyone	1 day	Low	12/18/2023	12/18/2023	8 hours
5.2.1	Close Contract	Everyone	1 day	Low	12/18/2023	12/18/2023	8 hours

IV. WBS Dictionary

WBS Dictionary Entry: 9/16/23
WBS Item Number: 1.1
WBS Item Name: Kick Off Meeting
Description: Damyan, Michael, and Seth initiated communications via Teams. Started planning the best ways to work together virtually that align with our schedules for a seamless workflow. Discussions about what the most realistic project option will be along with

developing a plan on how to execute the project began. Seth put together the first team status report for all to review and submit.

WBS Dictionary Entry: 9/18/23

WBS Item Number: 1.2

WBS Item Name: Project Selection

Description: Michael, Seth, and Damyan narrowed down the project idea to two different possibilities. They weighed the pros and cons of both ideas before deciding to go with the digital library project.

WBS Dictionary Entry: 9/24/23

WBS Item Number: 1._

WBS Item Name: Weekly Meeting

Description: Seth, Damyan, and Michael met together and brainstormed all the features they wanted to include into the digital library

WBS Dictionary Entry: 10/1/23

WBS Item Number: 1.9

WBS Item Name: Status Report #2

Description: Damyan, Michael and Seth discussed everything they did from the last report to now, and Seth put it all together in the second status report.

WBS Dictionary Entry: 10/8/23

WBS Item Number: 2._

WBS Item Name: Weekly Meeting

Description: Michael, Seth, and Damyan met up and began assigning roles to each member, setting up what each member would be responsible for

WBS Dictionary Entry: 10/15/23

WBS Item Number: 2.9

WBS Item Name: Team Status Report #3

Description: Seth, Damyan, and Michael discussed a potential framework for the project, including data entries in the SQL, and how the site features would be organized

WBS Dictionary Entry: 10/18/23

WBS Item Number: 3._

WBS Item Name: SQL Table development + Project Report

Description: Damyan, Michael, and Seth began development of the project.

WBS Dictionary Entry: 10/22/23

WBS Item Number: 3._

WBS Item Name: Weekly Meeting

Description: Michael, Seth, and Damyan met and talked about what was working and not working with the project. They thought of new ideas that could be added to the project, and got rid of a few ideas that would've been out of the necessary scope.

WBS Dictionary Entry: 10/29/23

WBS Item Number: 3.9

WBS Item Name: Team Status Report #4

Description: Seth, Damyan, and Michael met up and gave updates of the work being done to put into the report. Seth wrote up the report

WBS Dictionary Entry: 11/5/23

WBS Item Number: 4._

WBS Item Name: Weekly Meeting

Description: Damyan, Michael, and Seth added new minor roles to each member pertaining to objectives that were not assigned at the original assigning.

WBS Dictionary Entry: 11/9/23

WBS Item Number: 4._

WBS Item Name: Team meeting

Description: Damyan, Michael, and Seth discussed what each had previously worked on and

went over everything together. Damyan worked on getting default users and their metadata uploaded to SQL. Group collaboratively set up Microsoft Visual Studio and GitHub.

WBS Dictionary Entry: 11/12/23

WBS Item Number: 4.9

WBS Item Name: Team Status Report #5

Description: Michael, Seth, and Damyan offered new updates pertaining to SQL and GitHub to the report. Seth wrote up the report for the team.

WBS Dictionary Entry: 11/19/23

WBS Item Number: 5._

WBS Item Name: Weekly Meeting

Description: Seth, Damyan, and Michael discussed about any final details that still needed to be added to the project, while making sure the SQL was linked properly with the site

WBS Dictionary Entry: 11/27/23

WBS Item Number: 5.9

WBS Item Name: Team Status Report #6

Description: Damyan, Michael, and Seth met up for another status report adding in updates that they felt confident in being done and ready. Seth wrote the report

WBS Dictionary Entry: 12/3/23

WBS Item Number: 6._

WBS Item Name: Weekly Meeting

Description: Michael, Seth, and Damyan began putting the final touches on the site. Seth made sure all the php and coding was in place. Michael dealt with html to help the site look better and more pleasing to the eye. Damyan QA tested the main features of the website to make sure nothing was broken

WBS Dictionary Entry: 12/10/23

WBS Item Number: 6.9

WBS Item Name: Team Status Report #7

Description: Seth, Damyan, and Michael met and discussed the final updates for the site and SQL database. While working on those final updates though, they forgot to write up and submit the final report.

V. Timeline with Milestones

Phase	Description of Work	Start and End Dates
Phase I	<p>Planning - In this phase goals were defined. Along with goals, site structure, timeline, budget, and resource allocation were established.</p> <p>Key Milestones:</p> <ul style="list-style-type: none"> 1. Kick-off meeting 9/16 2. Project Selection 9/18 3. Schedule weekly team meetings 9/24 4. Develop proposal 9/31 5. Finalize project proposal 10/3 6. Define timeline & work plan 10/10 7. Define project budget 10/12 	9/16-10/25
Phase II	<p>Implementation - In this phase, designs were developed, as well as site architecture and databases.</p> <p>Key Milestones:</p> <ul style="list-style-type: none"> 1. Web Server access for group 10/26 2. Develop SQL tables 10/26 3. Beginning of PHP coding 11/1 4. Design and develop UI 11/20 5. Design and develop admin interface 11/20 	10/26-11/30
Phase III	Completion - In this phase QA testing, bug fixing, and documentation were dealt	12/1-12/17

	<p>with.</p> <p>Key Milestones:</p> <ol style="list-style-type: none"> 1. Begin testing the site for any errors 12/5 2. Bug fixing errors that were found 12/7 3. Documentation written up for project 12/12 4. Final testing for site to confirm no bugs 12/15 5. Submit final project 12/17 6. Submit team member feedback 12/17 	
--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

VI. Risks

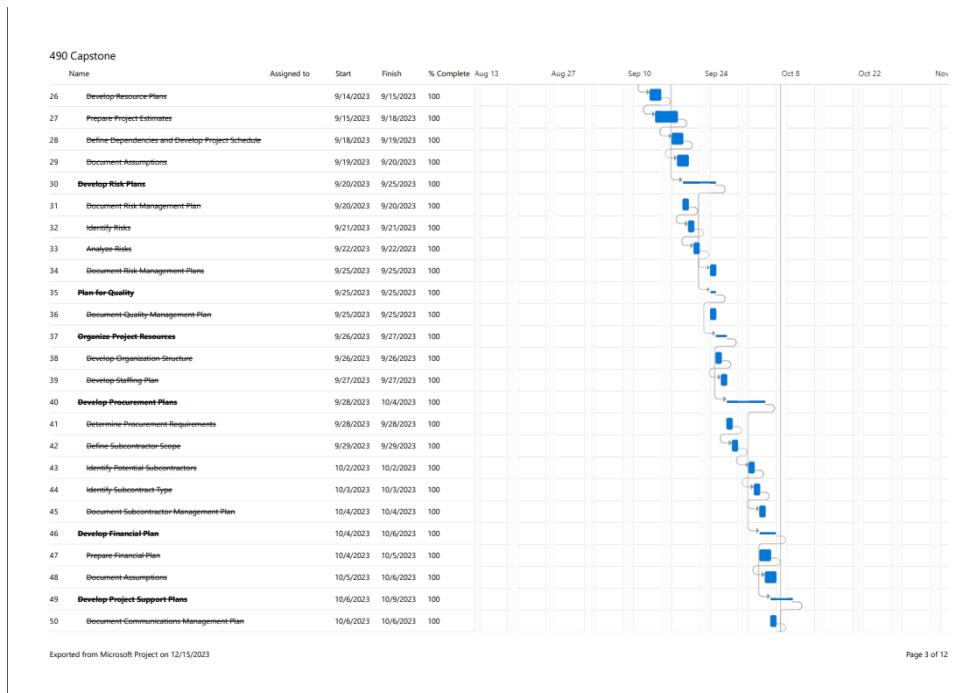

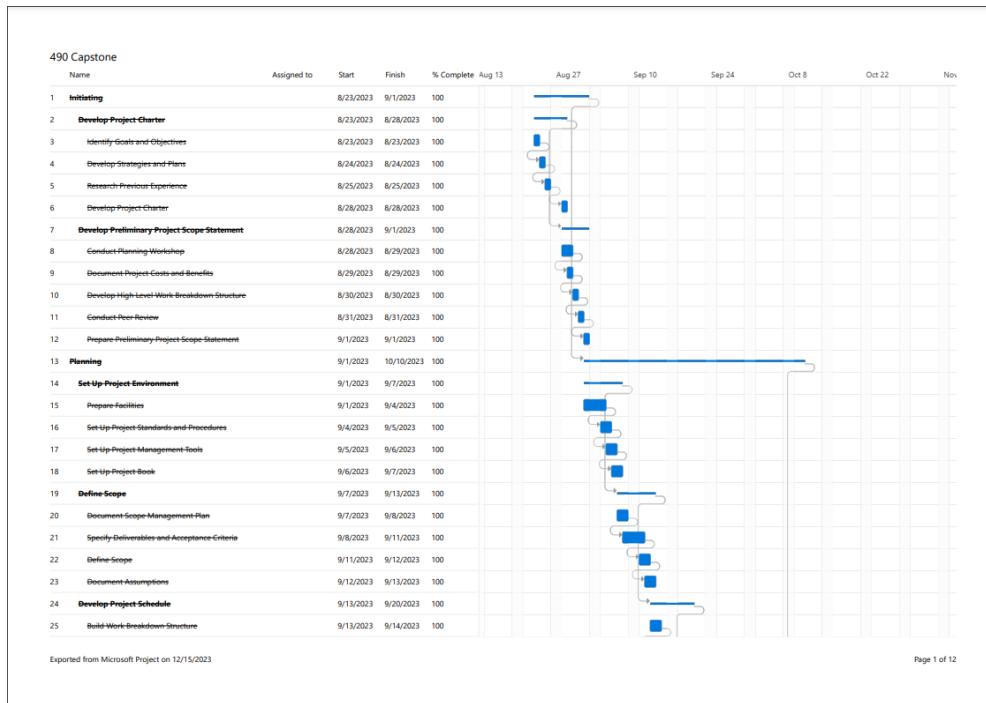

Business Risks

- Financial Constraints: Budget may become overrun due to unforeseen expenses. Will monitor, plan, and communicate budget adjustments.
- Resistance from library staff to change systems: Will provide a change management strategy that will include training.
- Loss of productivity during transition of systems: Will provide a change management strategy that will help minimize disruptions.
- Data security and privacy concerns: Will implement security measures, encryption strategies, and regular security checks.
- Incomplete stakeholder involvement: Will be in regular communication and involvement with stakeholders throughout the project.

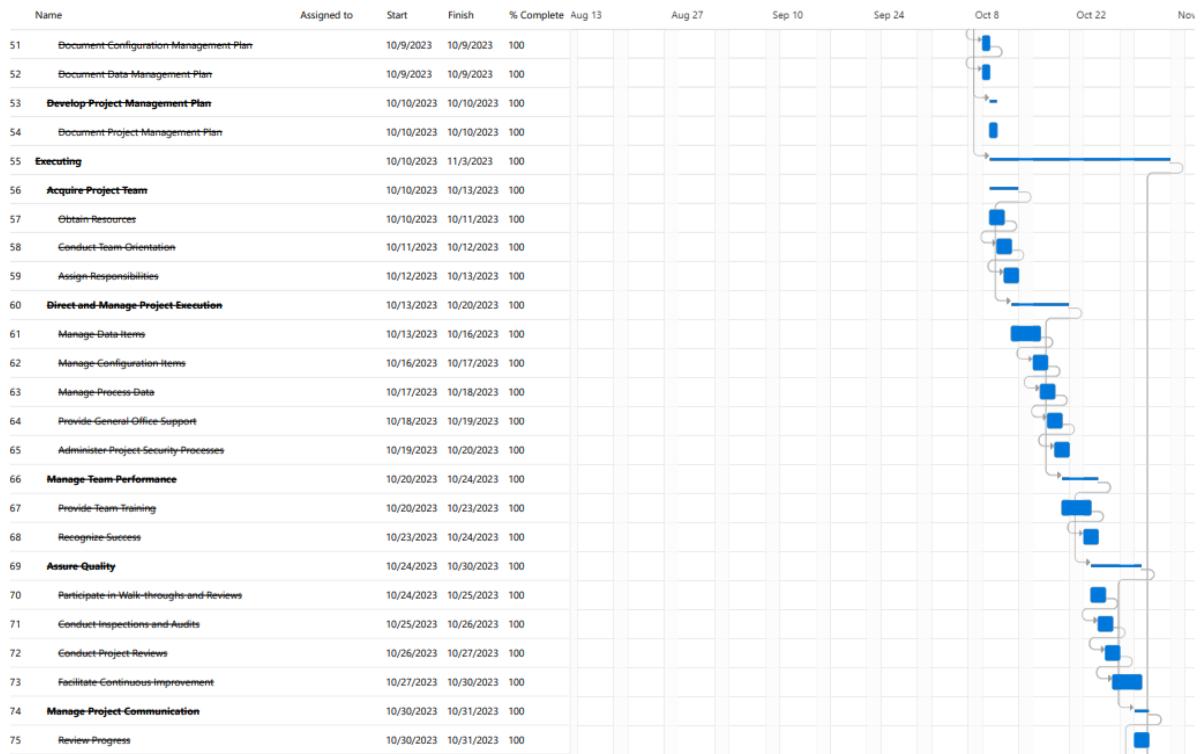

Technical Risks

- Data migration issues: Will conduct data mapping, validation, and testing during the process to minimize any issues.
- Integration challenges: May be challenges with any existing or third party systems. Will provide compatibility and integration plans.
- Technology may become outdated: Rapid advancement of technology may lead to the system becoming outdated before it's finished. Will regularly update and stay flexible for any future changes.
- User interface usability issues: Will execute usability testing with the end users.
- System downtime: Will continually execute backups along with a recovery plan that will schedule any updates during non peak hours.

VIII. Budget & Financial Information

The primary goal of the Library Digitization Project is to revolutionize the traditional record keeping processes of XYZ Public Library by transitioning from manual paper based file keeping systems to a comprehensive digital platform. The project necessitates materials to achieve its objective, including: document scanners for converting physical records into digital formats, secure servers for data storage, and user friendly software interfaces. Additionally, the budget sets aside funds for cybersecurity measures, staff training programs and ongoing technical support and maintenance. The project's financial scope is carefully set to not exceed \$20,000, which ensures a cost effective transition that aligns with the libraries commitment to serving the community with improved efficiency and accessibility by the project completion date of December 15, 2023.

Cost Estimates

Phase	Description of Work	Anticipated Costs
Phase I	The bulk of this phase revolves around the project manager and team leaders. This will require an average amount of weekly wages.	\$1,800 Project Manager \$45/h for 20 hours Team Leaders \$30/h for 30 hours
Phase II	This phase will require the Project Manager to incorporate the Coders and Databases to acquire a timeline for project completion	\$5,020 Project Manager \$45/h for 20 hours Coders \$35/h for 16 hours Databases \$35/h for 16 hours \$3,000 for equipment and software
Phase II	This phase will rely heavily on the coders to bring the project to full function and to also work with the project manager and receive feedback from the field.	\$10,000 Project Manager \$45/h for 20 hours Coders \$35/h for 240 hours Databases \$35/hour for 20 hours
	Total	\$16,820

Ongoing Costs

XYZ Library will need to account for the ongoing expenses for the technology and services which are essential for the system's continued operation, including web hosting, server space,

and internet connectivity. Additionally, XYZ Library will need to budget for the training of newly hired librarians post initial launch.

Initial Investment(C_0): \$20,000

Estimated Costs: \$16,820

Expected Cash Flows: \$6,000 (year 1), \$8,000 (year 2), \$15,000 (year 3)

Discount Rate(r): 8%

Net Present Value (NPV)

$$NPV = \sum \left(\frac{C_{Ft}}{(1+r)^t} \right) - C_0$$

$$NPV = \frac{6,000}{1.08} + \frac{8,500}{1.08^2} + \frac{15,000}{1.08^3} - 20,000$$

$$NPV \approx 5,555.56 + 7,331.70 + 11,938.22 - 20,000$$

$$\mathbf{NPV \approx \$5,825.48}$$

Return on Investment (ROI)

$$ROI = \frac{\text{Net Profit}}{\text{Cost of Investment}} \times 100$$

$$ROI = \frac{\text{Total Cash Flows} - \text{Initial Investment}}{\text{Initial Investment}} \times 100$$

$$ROI = \frac{(6,000 + 8,500 + 15,000) - 20,000}{20,000} \times 100$$

$$ROI = \frac{29,500 - 20,000}{20,000} \times 100$$

$$ROI = \frac{9,500}{20,000} \times 100$$

$$\mathbf{ROI = 47.5\%}$$

Payback

$$\text{Payback Period} = \frac{\text{Initial Investment}}{\text{Net Annual Cash Flow}}$$

$$\text{Payback Period} = \frac{20,000}{6,000}$$

$$\mathbf{Payback Period \approx 3.33 \text{ years}}$$

IX. Project Team

Project Sponsor: Dee Piziak

Project Manager: Michael Binelli

Team Members

- Programmer(s): Michael Binelli, Seth Kaderabek
- MySQL integration: Damyan Michel, Seth Kaderabek
- Writer(s): All
- XXX Assurance/Tester: All

- Project Status Reports: Seth Kaderabek, Damyan Michel
- System Architect: Michael Binelli, Seth Kaderabek

Customer: XYZ Library

Key Stakeholders: Library staff, Library patrons, Community members, IT department, Project manage, Funding sources(government agencies, grant providers), Technology vendors, Local government, Educational institutions

X. System Prototype

Introduction

The system prototype for the Library Digitization Project at XYZ Library tackles the challenges posed by traditional paper based systems by providing a cutting edge solution designed to streamline operations, enhance accessibility, and manage data efficiently.

- The system can be accessed via the following links: [Guestbook \(uwm.edu\)](#)

Entry Form (USER)

The Add New Account form is where new users will enter their information to create a new account.

The screenshot shows a dark blue header with the XYZ Library logo in a white circle. Below the header, there are navigation links for 'Homepage' and 'Add New Account' on the left, and 'Login' on the right. The main content area has a light gray background and features a 'Sign Up' button at the top. Below it are five input fields for 'First Name', 'Last Name', 'Email Address', 'Password', and 'Confirm Password'. At the bottom of the form is a large dark blue 'Register' button.

The checkout page is where users who are logged in will check out a book. That data is processed in the items database.

The screenshot shows a list of books available for checkout. Each book entry has a title, ISBN, and a 'Checkout' button.

- Title:** 1984
ISBN: 9780451524935
Checkout
- Title:** A Christmas Carol
ISBN: 9780143122494
Checkout
- Title:** A Tale of Two Cities
ISBN: 9780486406510
Checkout
- Title:** A Tale of Two Cities

Administrative Backend

The admin interface can be accessed after logging in as an admin here: [Guestbook \(uwm.edu\)](http://Guestbook.uwm.edu)

- Admin login:

- userID: [REDACTED]
- Password: [REDACTED]

1. Logging in

- When in the website click on the login button in the top right of the screen, enter in your credentials, then click the login button at the bottom of the screen.

The screenshot shows a login form with fields for Email Address and Password, and a 'Login' button at the bottom.

Email Address: _____
Password: _____
Login

Copyright © InfoST-490 Senior Capstone 2023 | Designed by: Seth Kaderabek | Michael Binelli | Damyan Michel | Sponsored by: UWM

b.

2. Logging out

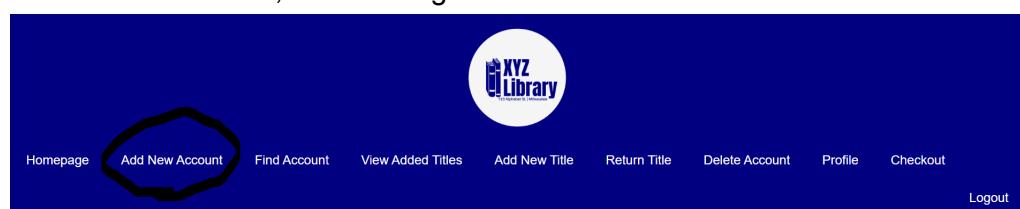

- Once logged in, when you want to logout, click on the logout button on the right side of the header

b.

3. Adding a new user

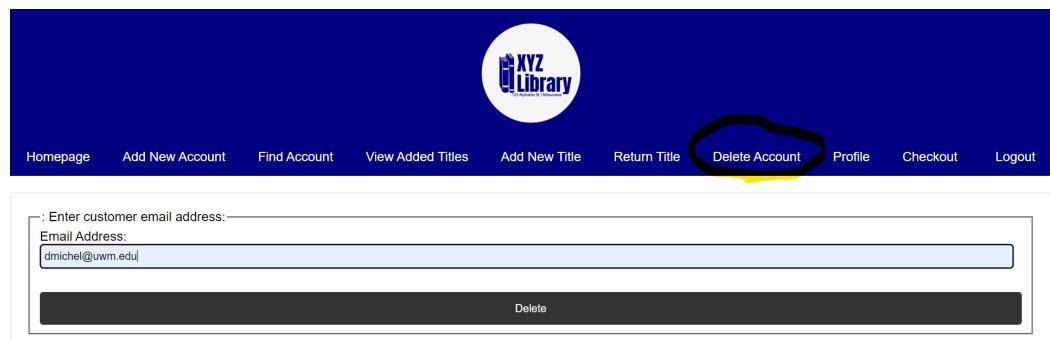

- Click on add new account and input all of the information needed to make an account. When done, click the register button at the bottom

b.

4. Deleting a user

- When needing to delete an account, click delete account, then put in the user's email. Once submitted, the site will find the profile associated with the email and delete it from the database

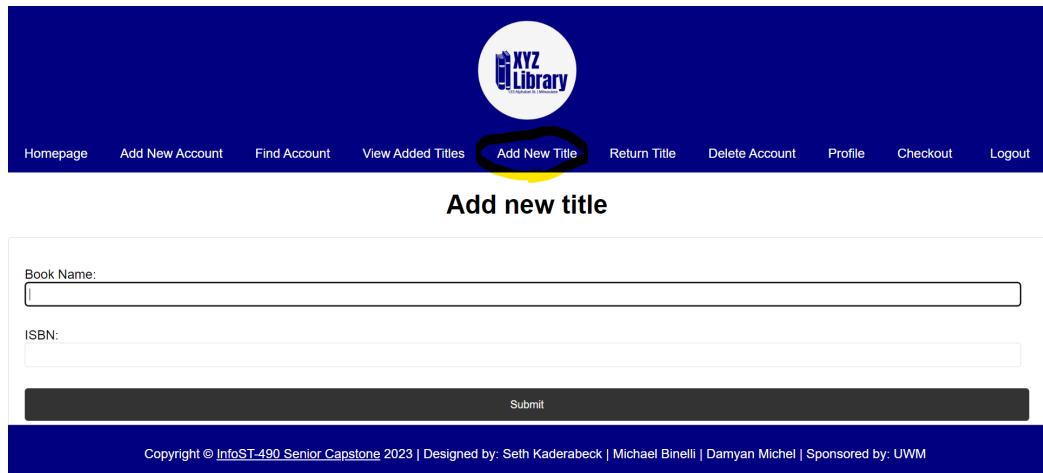

b.

Copyright © InfoST-490 Senior Capstone 2023 | Designed by: Seth Kaderabeck | Michael Binelli | Damyan Michel | Sponsored by: UWM

5. Adding a new book

- Click on add new title tab and put in the book's name and ISBN. Once done, click submit

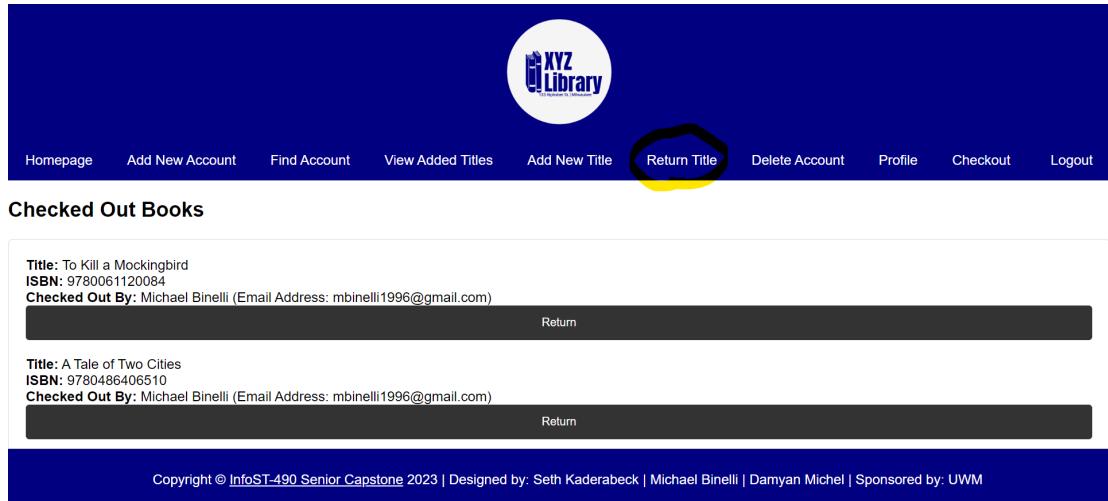

The screenshot shows the XYZ Library homepage with a navigation bar at the top. The 'Add New Title' button is circled in yellow. Below it is a form titled 'Add new title' with fields for 'Book Name:' and 'ISBN:', both with placeholder text. A 'Submit' button is at the bottom. At the very bottom of the page, there is a copyright notice.

Copyright © InfoST-490 Senior Capstone 2023 | Designed by: Seth Kaderabeck | Michael Binelli | Damyan Michel | Sponsored by: UWM

b.

6. Viewing and Editing a currently checked out books

- When needing to return a user's book, click on return title, and find the correct book being returned, and make sure the correct email is with the book. Click return when the book is found.

The screenshot shows the 'Checked Out Books' page. It lists two books: 'To Kill a Mockingbird' and 'A Tale of Two Cities', each with its ISBN and the name of the person who checked it out. Below each listing is a 'Return' button. At the bottom of the page, there is a copyright notice.

XI. System Documentation: Users

User Interface

The public interface can be accessed at:

<https://kaderab6.soisweb.uwm.edu/seniorcapstone/finalproject/index.php>

1. Signing up
 - a. Once in the website, click add new account, and put in your information. Once done, click register at the bottom

The screenshot shows a dark blue header with a circular logo containing 'XYZ Library'. Below the header, there are two buttons: 'Homepage' and 'Add New Account' (which is circled in yellow). To the right is a 'Login' link. The main content area is titled 'Sign Up' and contains five input fields: 'First Name', 'Last Name', 'Email Address', 'Password', and 'Confirm Password'. At the bottom is a large black 'Register' button.

2. Logging in
 - a. Once registered, click login on the right side of the header, put in your email and password, then click login.

The screenshot shows a dark blue header with a circular logo containing 'XYZ Library'. Below the header, there are two buttons: 'Homepage' and 'Add New Account'. To the right is a 'Login' link (which is circled in yellow). The main content area is titled 'Login' and contains two input fields: 'Email Address' and 'Password'. At the bottom is a large black 'Login' button.

3. Logging out

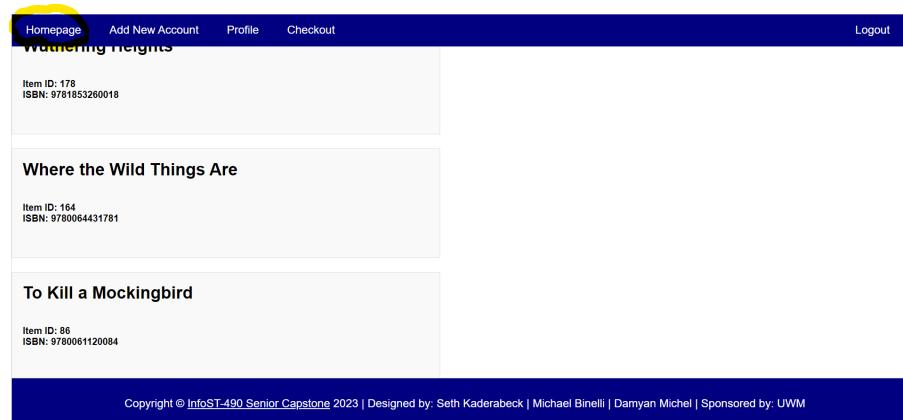

- Once done on the website click logout in the top right, and you'll be logged out immediately

b.

4. View collection of books

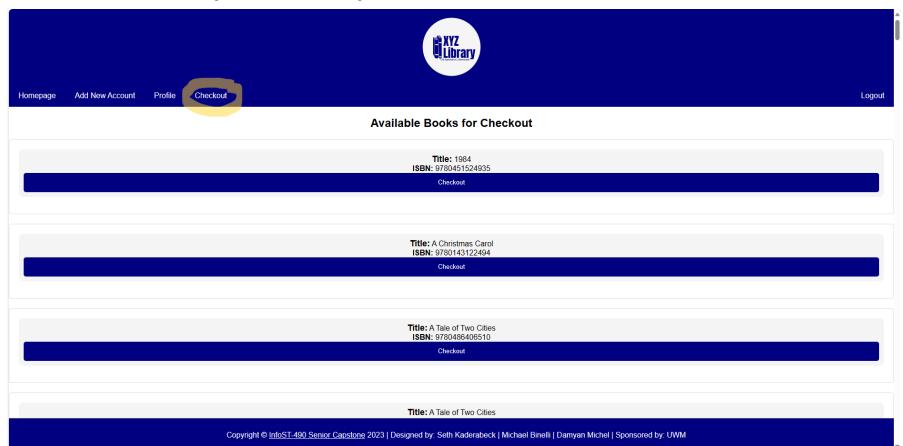

- If you want to browse, click homepage, and scroll through however many pages of books as you desire

b.

5. View if a book is currently available or checked out

- When you are ready to checkout a book, click checkout and scroll through the list of books, which you will only see books that aren't checked out

b.

6. Checkout a book

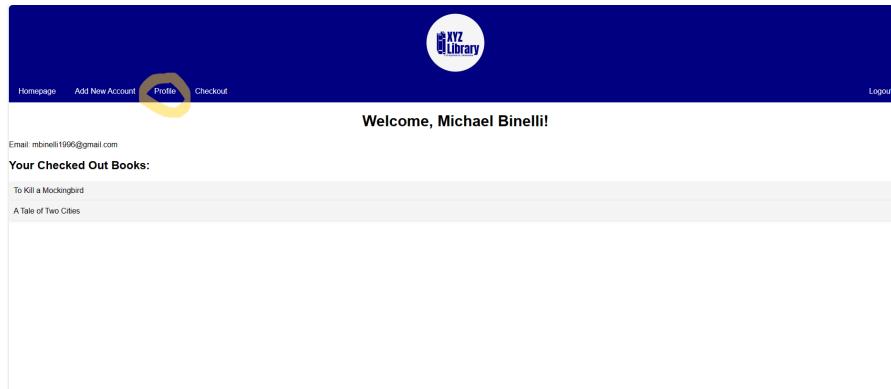

- a. When you find your book, click the blue checkout button below a book and you get a success screen to pop up

b.

- 7. View what books they currently have checked out

- a. If you want to see what books you have checked out, click on the profile tab, to see your name, email, and any books that you'd have checked out

b.

XII. System Documentation: Technical

Code

The system is located at:

<https://soisweb.uwm.edu:2083/cpsess5687500901/frontend/jupiter/filemanager/index.html>

Directory: publichtml/seniorcapstone/finalproject

All working code is available here. See Code Documentation (page 34) for examples.

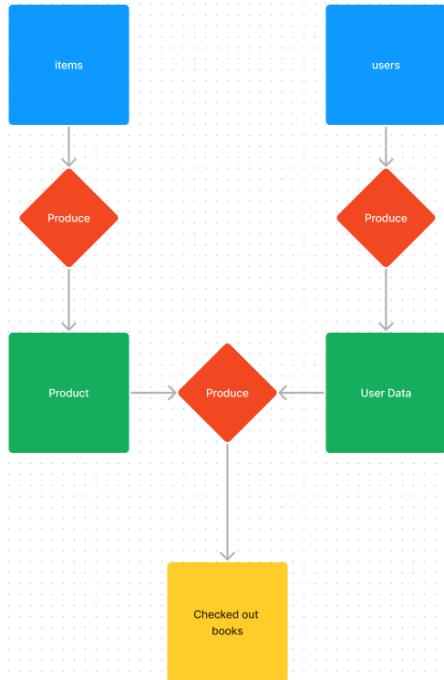

Detailed Statement explaining main configuration work

Two user interfaces were created with the help of PHP, MySQL, HTML, and CSS. The first interface is for normal users, where they can create an account, check out books, which updates the database pertaining to which books are checked out or available, and view their

profile. The second interface is for admin users where they share the same features with normal users, but can also add books to the database, return users' books, and find and delete accounts. PHP was done mainly by Seth. HTML and CSS was done by Michael. SQL data info and integration was done by Damyan, with assistance by Seth.

Entity Relationship Diagram (ERD) and Table Schemas

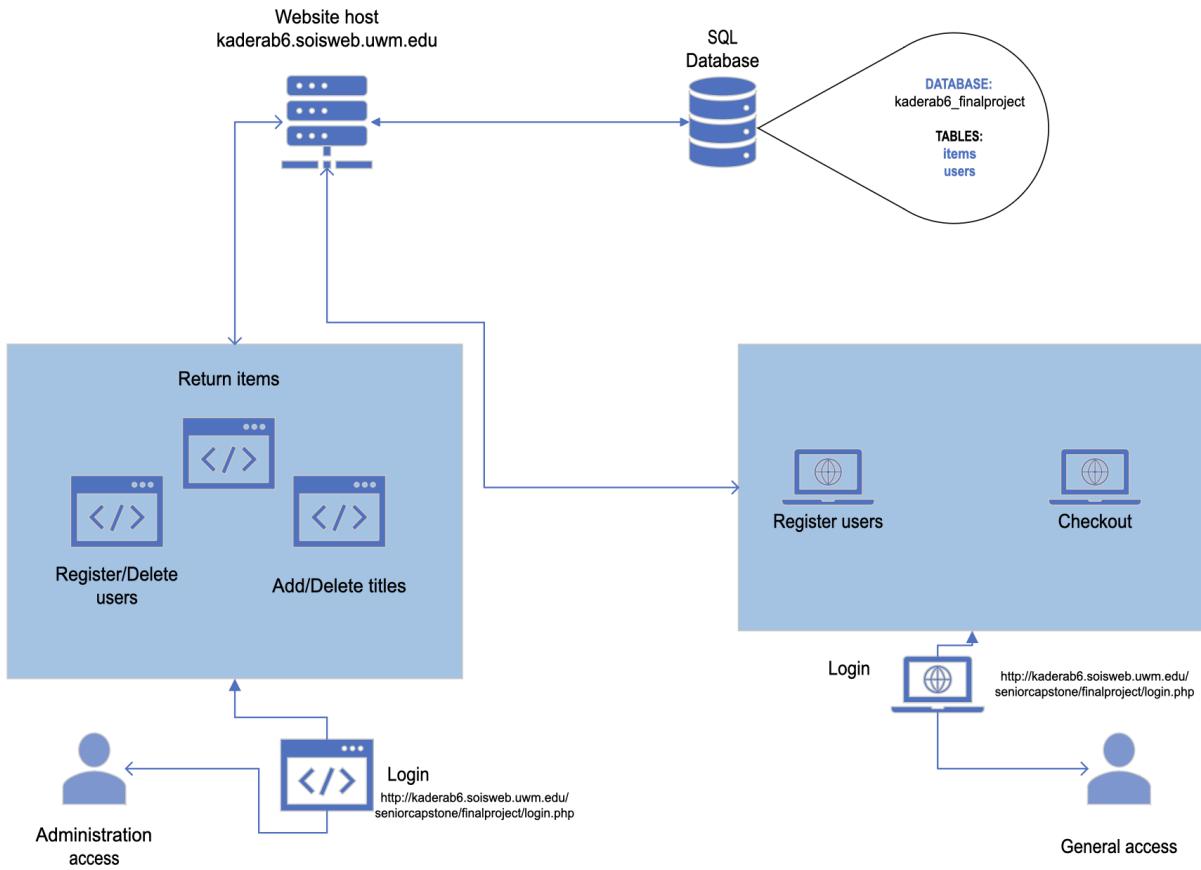

XYZ Library ERD

users		items	
PK	user_id	PK	item_id
	first_name		item_name
	last_name		item_upc
	email		checked_out_by_id
	pass		
	registration_date		

A curved double-headed arrow connects the 'user_id' column in the 'users' table to the 'checked_out_by_id' column in the 'items' table, indicating a many-to-many relationship between users and checked-out items.

System Architecture Diagram

XIII. Lessons Learned

Given the choices available to us to complete this project, we have chosen to create a project revolving around the tools and processes that are used by current libraries and are necessary for efficiently integrating the various items available to the consumer with an easy way for employees to interact with. While this project involved various complicated and demanding steps, it was very satisfying to complete a project that could potentially have many real-world uses as well as help with outdated software and other limitations that many library systems face.

Developing a solid plan of action in terms of workload, scheduling coordination, and determining realistic outcomes was the most challenging hurdle we have faced while completing this project. While each member has reliable internet access, coordinating schedules created a difficult dilemma. However, using online collaboration tools and features, we were able to also contribute on our own time without having everyone else online. This definitely paved the way to success in completing this project in a timely manner. Furthermore, we planned team meetings whenever time allowed us to be available at the same time. These meetings allow us to bounce off different ideas properly, communicate any issues regarding project development, collaboration, and workload, and work through issues in a reasonable timeframe.

Overall, navigating through this project realistically while making everyone involved and active made sure that we successfully completed this project.

In the future, a solid team meeting schedule would definitely benefit the group and would allow for each member to voice ideas and opinions without the limitations presented over text.

XIV. Code Documentation

The finished product contains multiple, extensive files. The following code examples form the main structure of the project.

mysqli_connect.php

```
<?php
DEFINE ('DB_HOST', 'localhost');
DEFINE ('DB_USER', 'kaderab6_finalprojectadmin');
DEFINE ('DB_PASSWORD', '[D-VPsFjtc4-]');
DEFINE ('DB_NAME', 'kaderab6_finalproject');

$dbc = @mysqli_connect(DB_HOST, DB_USER, DB_PASSWORD, DB_NAME) OR die ('Could
not connect');
?>
```

style.css
